

## ■ You make a PDF file using scanned materials

☆The preparation

(1) You install “Bullzip PDF Printer” on your PC, if not yet.

(2) First, you prepare more than 2 scanned files. The files should have sequence numbers as the below picture.

(3) Set to Windows to start “Windows Picture and Fax Viewer” as the default when you click your scanned file if not yet. To do that, you click right-button of mouse on a photo file as the below.

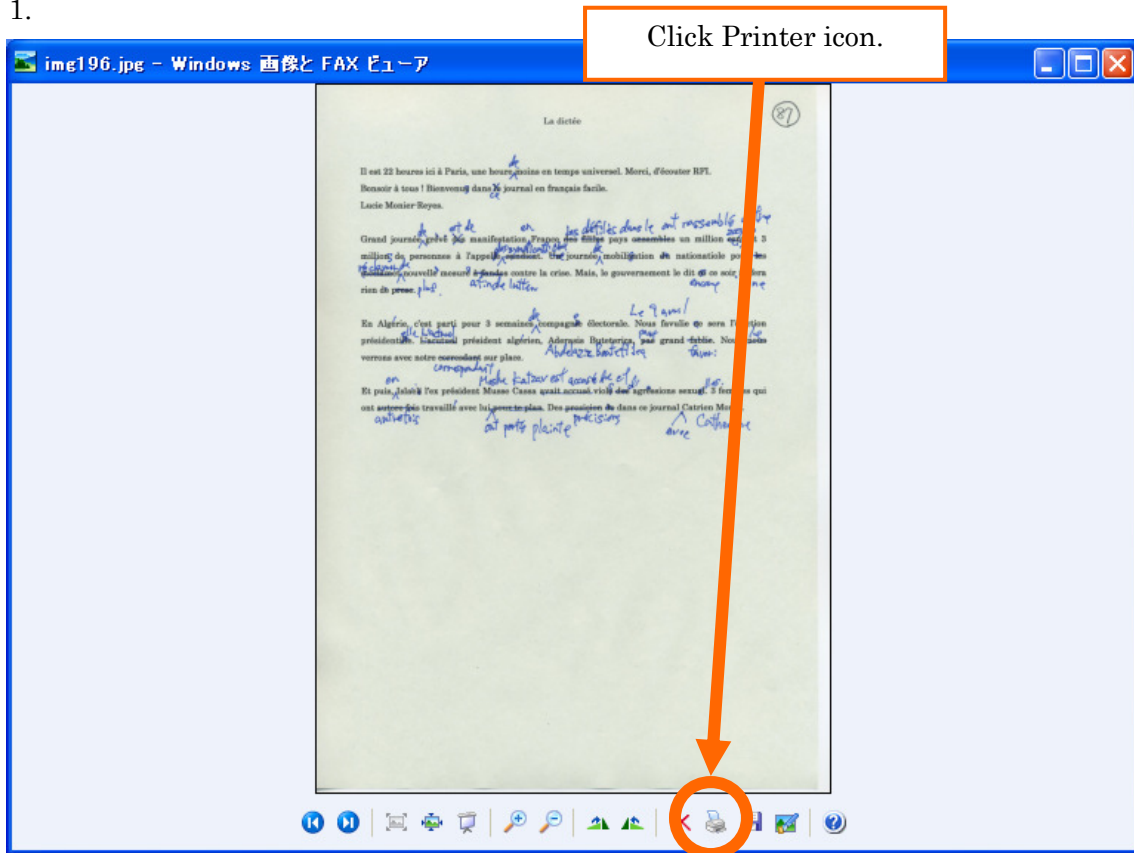

Sequence numbers

Choose “Windows Picture and Fax Viewer”.
