

How to make seasons on the earth

This above picture shows you our globe. Sun rays come from right side in this picture. "X" is equator. Now, "A" is longer (bigger) than "B". That means "A" gets more sun rays than "B". "A" is hotter than "B". This picture above shows you that the Northern Hemisphere is summer, now.

The Southern Hemisphere is summer

This above picture shows you our globe. Sun rays come from left side in this picture. "X" is equator. Now, "B" is longer (bigger) than "A". That means "B" gets more sun rays than "A". "B" is hotter than "A". This picture above shows you that the Southern Hemisphere is summer, now.
