

## ■ What you can do with Epson Scanner GT-S600 is ...

### What you can do with Epson Scanner GT-S600 is ...

(1). With a few RAM, you can scan with Epson Scanner GT-S600. For example, I could scan some photos in 1,200 dpi with Epson Scanner GT-S600, whose PC has only 256 RAM. It takes about 7-8 minutes. Of course, I could not open to see the scanned file, but it is just short of RAM. In this case, I could open to see it with another PC, which has enough RAM.

(2). When you scan some document with Epson Scanner GT-S600, any rainbow around its scanned picture does not appear.

(3). You can focus on a part of photo or document during scanning.

Before doing this, you do preview scan, and then, you select a part as the below.
