

■ Knowing the limitation of Sound Recorder

Knowing the limitation of Sound Recorder

There is a tool of Sound Recorder which locates in Accessory. You use it for recording any kinds of sound. But Sound Recorder has the limitation of its using.

- 1) You can record sound max. 1 min. with it.
- 2) You can record only “wav” extension with it.

So, anybody who wants to record longer than 1 min. must buy some kind of software for it. For me, I use Roland Music Creator. This kind of Music software is available not for music, but also for speech or any kinds of sound.

Also, this kind of software converts in several types of file. For example, Roland Music Creator converts into “wma”, “mp3” and “wav”.
